What is a cookie?

Cookies are used on virtually all websites. In some cases, they ensure the website functions as intended. A cookie is a little file that is saved on the computer or device which you use to visit the websites.

By using cookies, it is possible to recognize your computer and gather information on your visit. Cookies do not let us know who you are, what your name is, where you live or if your computer is used by others than you. Cookies can't spread viruses or other harmful software.

Cookies for user experience, performance and marketing

When you visit our websites, we ask you for consent to use cookies for user experience, performance and marketing. You can change your settings and deselect cookies here on our cookie page.

If you reject the pop-up-banner by clicking on the cross, you will reject all cookies except the strictly necessary ones for the page to be displayed correctly. Of course, we will remember your choice, and we remember this with the help of a cookie as well. If you click "accept", you say yes to all cookies, as described.

Different types of cookies

Strictly necessary

Cookies necessary for the website to work. Contains no statistical, marketing-related or personal information.

User experience

Improves your user experience on the website by remembering your preferences and settings.

Performance

Helps us make sure that the website is working properly and lets us try out different ideas.

Marketing

Help us understand how our website is being used, how effective marketing campaigns are and help us to customize and improve the website.

How long are cookies stored?

It varies depending on the specific cookie and the script that sets the cookie. The lifetime of a cookie is calculated according to your last visit to our website. When a cookie expires, it is automatically deleted. All our cookies' expiration periods are specified in our cookie banner on our website. A cookie with no expiration period specified will expire when the browser is closed.

Cookie removal or deletion

You can always remove and delete internet cookies on your device. You do this in the browser with which you access the internet. Where you find the cookie removal settings depends on which browser you use. If you delete cookies from your browser, you may find that some features are not working properly and the website will be slower than usual, as the website uses cookies to remember some of your choices.

You can remove cookies from all browsers, either individually or all at once. If you use more than one browser, remember to clear cookies in all your browsers.

[Here are links to guides on how to delete cookies in different browsers.](#)
